

ARTHUR JAMAIN

DEVELOPER | PROBLEM SOLVER

arthur.jamain@gmail.com

(+33) 6 50 87 39 77

Profile

Hi ! I'm Arthur, a Web enthusiast and developer based in Paris. I enjoy solving problems, crafting interfaces and shipping polished products. I also quite enjoy fresh beer and futile discussions !

Skills

Web Applications

The Web is my home. Above all other technologies, Javascript (client/server), HTML5 and CSS3 are the tools I'm the most familiar with and enjoy the most.

Interface Development

I believe UI and UX are the most crucial elements for public apps. An efficient interface is key to a successful product.

Architecture

Architecture is the best part. Breaking everything down and planning every pattern, algorithm and component of the application. *Shivers*.

Technical

Javascript / Node.js

jQuery / Backbone / Various libs ... Linux / OS X

HTML5

C / Objective-C

Photoshop basics+

CSS3 / Preprocessors

Shell

Git

Experience

Joshfire — Paris

Web Developer

2011-2013

Joshfire went from editing multi-device apps using Web technologies as a service to editing connected objects — such as a connected couch or mirror. My role is to design, code and manage any web components wrapping these objects, as well as fiddling with the objects themselves whenever necessary. This means designing APIs with which the objects interact, and interfaces for the user to interact with the object. Most of the work is done using Joshfire's frameworks on which we've iterated a lot. The multi-device aspect remains there, implying a fair knowledge of the various mobile / tablet / TV platforms.

Caisse d'épargne — DEE Metz

Junior Consultant (Internship)

2010

My job there was to audit the business processes of the calling center I was working in and isolate bottlenecks. The second part of the internship was to devise and execute a solution to eliminate said bottlenecks.

Serious Agency — The Internet

CEO / Developer

2009-2011

A Web agency we founded with three colleagues. Although it had to end for various reasons — albeit gracefully —, it allowed us to acquire perspective on the various facets of business as a whole as well as practical experience in development and project management.

Education

EXIA / CESI - Nancy, France

"IS Manager" — Level 1 diploma (European standard). 985 TOEIC — Fluent English. SI Baccalauréat with European mention.

Miscellaneous

I love to draw and try to paint things using watercolour. I love traveling. Music is a fuel to me.
